**God Still Heals Today** . . . (reprinted with permission)

**Mariette Trepanier, Caledon East, Ontario.**

Mariette Trepanier is the wife of Rev. Roy Trepanier, Executive Director of Ezra Canada, [www.ezracanada.org](http://www.ezracanada.org), a ministry that Rescues, Restores and Returns poverty-stricken Jewish people in the former USSR countries and assists them to make their "Aliyah", their return back to their God-given land of Israel, as foretold by all the old-testament prophets. When Rev. Roy spoke at Gilead Fellowship in Picton, Ont. last September, 2008, he shared this story.

"Two and a half years ago, Mariette was diagnosed with Large Granular, T-Cell Lymphocytic Leukemia. After numerous blood tests and trips to the Oncologist, Nephrologist, Rheumatologist and other "ologists", it became necessary to obtain a bone marrow biopsy about three months ago, along with discussion of a potential bone marrow transplant. At that time, they put out a global appeal for prayer, but also (for the first time) began claiming God's promised blessing in Genesis 12:3 and 27:29 and Numbers 24:9 for a total healing. Rev. Roy said, "When God repeats himself three times, we should listen up!"

With a sudden drop in Mariette's hemoglobin to 65, a dangerously low level, the Credit Valley Hospital in Mississauga prepared to give her a blood transfusion mid-August. However, Mariette's overall appearance, other test results, and general good health changed their mind on that. (They said that she was a conundrum, her appearance denying their reports. Also, Roy and Mariette had prayed against her having a blood-transfusion.) A short experiment of steroids (three weeks) was recommended in an effort to better understand what was going on in her body, why there was no internal bleeding, anemia or fatigue as they expected. They left that meeting buoyed up because the Lord had answered their prayer regarding the blood transfusion.

A month later they had their follow-up session with the Oncologist who had all the recent blood work results, with and without the steroids. This time there were two Oncologists who entered the room discussing the new reports and shaking their heads. They started by saying that Mariette was doing very well. Her hemoglobin was up to 89, her bone marrow was producing "baby" red blood cells, and on and on she went, reciting all the great numbers and the medical terms referred to in the report.

Finally Rev. Roy said "Hold it ... with all these things that you are talking about, what about the Leukemia? What is happening with that?"

One Oncologist cleared her throat a bit and said "Well, actually, at this time, there is NO SIGN OR EVIDENCE OF LEUKEMIA IN HER BODY, ANYMORE !!!"

Rev. Roy praised the Lord, and has thanked everyone who had prayed, and told them they were part of this miracle.

They went back in mid-September to double-check all these things, and Rev. Roy hoped the doctor would write that it was a miracle. At that time, they learned that Mariette's bone marrow was still producing "baby" red blood cells, her hemoglobin was up to 89, and her white blood cell count was at 2.3, up from .05, which was huge. However, the oncologist would not go on record as calling it a "miracle". The best Rev. Roy could get out of her was, "There is no medical explanation for these results."

Mariette has given her testimony in church services with over 300 people present, as well as a ladies Conference of 150 in Windsor, Ont. Our God (Jehovah Rapha) still heals today!

UPDATE...As of March, 2012, Mariette continues healthy and vibrant and the Oncologists require only bi-annual visits to keep tabs on her. The 700 Club heard about Mariette and are scheduled to bring a film crew in mid-March to document this miracle of God for their viewers. God is soooooooooooooooooooooo good !!!!!!!!!!!!!!!
